

Hudisa 

**The ideal partner for your purées,
concentrates, frozen fruit,
strawberries, raspberries,
blackberries and blueberries.**

WHO ARE WE?

Hudisa began in 2002 and is located in the heart of the province of Huelva. Hudisa is the product of our commitment, commercial vision, and the continued collaboration of the 19 most important berry producing cooperatives. Which are undertaking a vertical integration in the transformation of the fruit industry.

Our company processes and markets purées, concentrates, frozen strawberries, blackberries, pomegranates and avocados cultivated in the province of Huelva, the largest fruit producing area in Europe. It produces three different product lines: Conventional, Babyfood and Organic.

We are currently the leading company in southern Europe for the volume of berries processed, with a production capacity of more than 20 million kg/year.

QUALITY FROM THE SOURCE

As a method of ensuring excellence, Hudisa has developed its own system to guarantee that the product is harvested from the field and arrives at our facilities in less than 24 hours, thus ensuring the organoleptic characteristics of the original fruit.

Following rigorous quality control, we guarantee that only healthy fruit at the optimum ripeness point are accepted during the process, and the unripened white fruit, the leaves, the caps, and foreign bodies are extracted and that there is no decay or infection. This ensures that the quantity, quality, and other characteristics meet the established quality standards.

Our corporate values are founded on the following principles:

Conserving the fruit's natural qualities throughout the length of the process.

Guaranteeing food safety during all phases.

Fulfilling the client's expectations and satisfying their needs.

THE COMPANY IN NUMBERS

Southern European leader in volume of berries processed.
+20 million kg/per year

+1000 farmers
under the same philosophy: taking the utmost care of the fruit while processed

Work force:
150 personnel who guarantee quality control and food safety throughout the process

Maximum production: 350 MT/day

OUR PRODUCTION PROCESS

In general, the stages in our process are:

Fruit reception

Incorporate the fruit into the process

Enzymatic inactivation

Extraction and refining

Concentration

Pasteurization

Aseptic filling

OUR FACILITIES

Hudisa has facilities of more than 6,000 m², strategically located in a production area, which allows us to ensure the fruit arrives in perfect condition. There are two processing lines, a concentration area, and two aseptic packaging lines in our factory. We also have a frozen line and storage area that ensures the perfect preservation of the product's organoleptic characteristics.

hudisa 

QUALITY CERTIFICATIONS

INNOVATION & JOINT RESPONSABILITY

Hudisa is a company committed to sustainability, the reduction of its water footprint and the greenhouse effect.

Designating resources to update our facilities and machinery. Moreover, investing in our human capital, offering ongoing training and a commitment to internal promotions. Consciously working to reduce the impact of our activities on the natural world.

Our activity is based on sustainable agricultural processes to protect our farmers and their land.

Hudisa has committed itself to various initiatives so that the industrial activity and transformation undertaken has been and continues to be the most sustainable possible. Photovoltaic self-consumption, the economization and reduction in our water footprint are just some examples of this new phase as an environmentally sustainable business.

INTERNATIONAL LOGISTICS NETWORK

We are in more than 30 countries on 5 continents

COMUNICACION NETWORK IN EUROPE

With logistic centres in Central and Northern Spain it is possible to meet the urgent requirements of our clients. Our location is another competitive advantage.

Not only because we are in the heart of the largest fruit producing area of Europe, the largest producer of berries in Europe, but also due to the proximity of our facilities. As a direct consequence the fruits arrive in the best conditions.

We have ports near Lisbon, Sines, Huelva, Cádiz, Algeciras and Rotterdam.
